Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claim 1-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Lapstun et al. (6681045).

Lapstun discloses a method and a system for managing information input via a sensor device and a position-coding pattern printed on a product, comprising; coordinate reading means for reading coordinates of the sensor device (101, Fig. 2)

based on movement of the sensor device relative to the position-coding pattern (Fig. 1), the coding-coding pattern being divided into at least a first and second region (for example, name, address, and submit); and information management means for executing an information management function based on coordinates read from the first region (the submit region), and information management function managing information formed by coordinates read from the second region. Lapstun further discloses the information management function executed by the information management function means is a submit function which enables the sensor device to send coordinates from a send area of the first region to a data base device which allocates a particular send address to the send area. Lapstun further discloses connecting the system to an internet (col. 8, lines 4, 43-44), and submitting information through e-mail (col. 26, lines 30, 56).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lapstun et al. ('870) discloses an input device.
